Hunter is the best!! His classes are very structured/intentional and complement the lectures nicely. I attended every discussion section because I found them to be very beneficial to my learning. It's clear that he cares about student learning and fostering community in discussion sections. He's also very approachable for help, and if you don't understand something the first time he explains it, he's happy to explain again until you understand. No feedback—Hunter is a really excellent teacher!!!

The TA for this class is phenomenal. In most of my math classes students don't collaborate within the class. In discussion he created space for us to collaborate and discuss the math which both helped my understanding of the topics and made it easier to make friends in the class. He is also extremely knowledgeable and has a fun and entertaining way of explaining math concepts. I would be having a much better experience with all of my math classes if all my TAs were like my TA for 131A.
