## Questions focused on Teaching Assistant

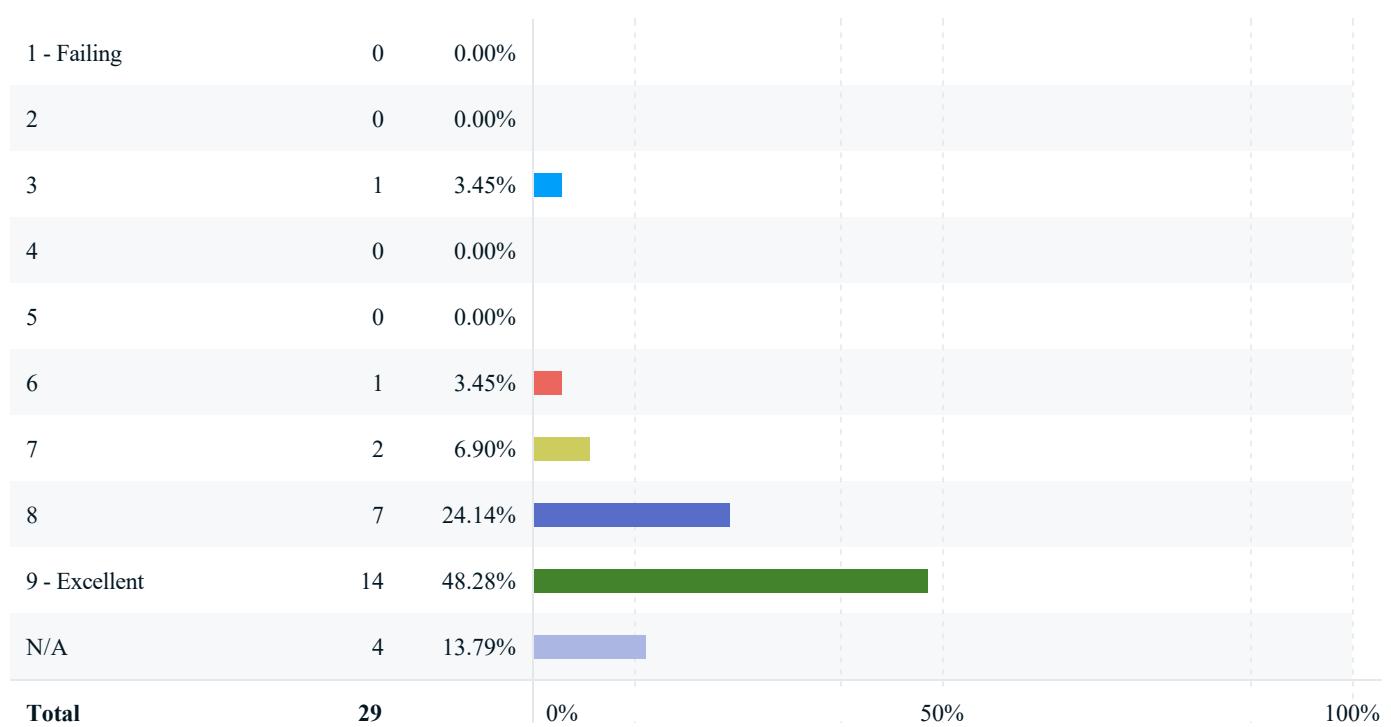

### UCLA Department of Mathematics

#### 1. How would you rate your TA as an effective teacher?

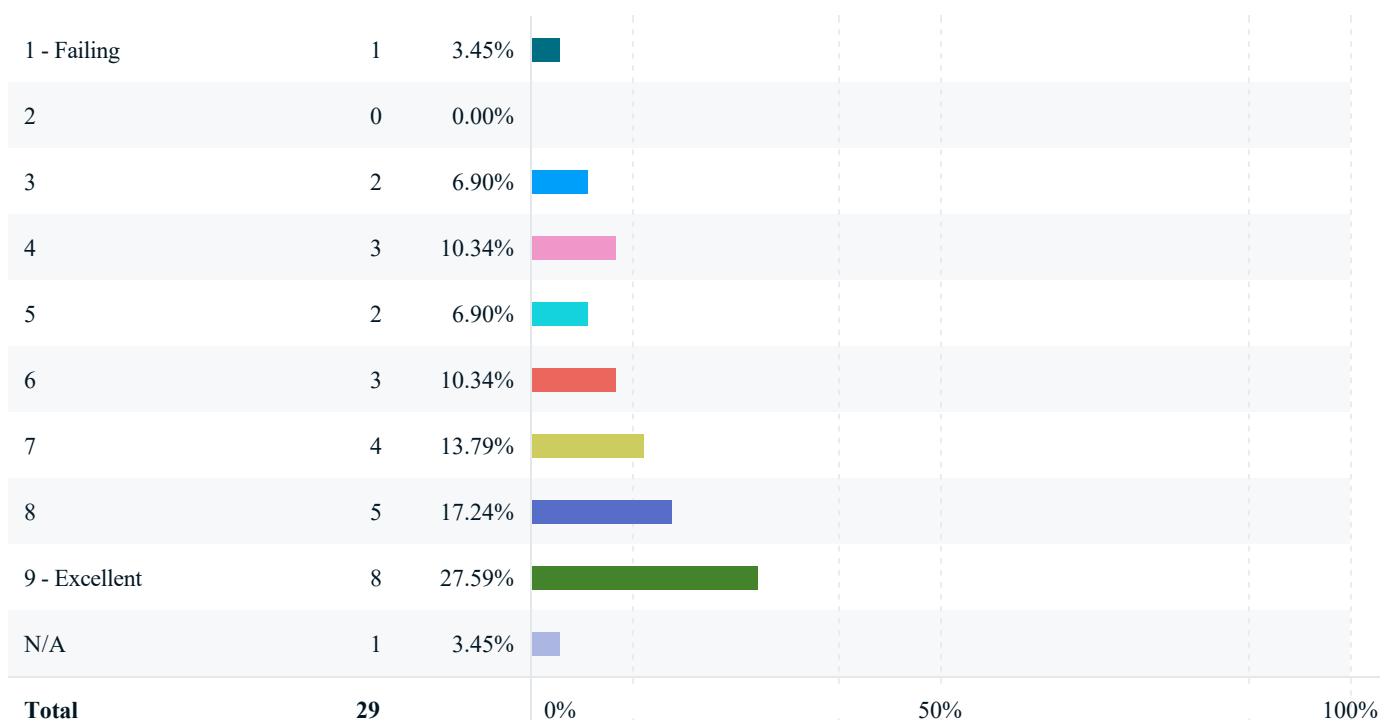

Statistics	Value
Response Count	29
Response Ratio	93.55%
Mean	8.19
Median	9.00
Mode	9
Standard Deviation	1.30

## 2. How would you rate the availability and helpfulness of your TA outside of the classroom?

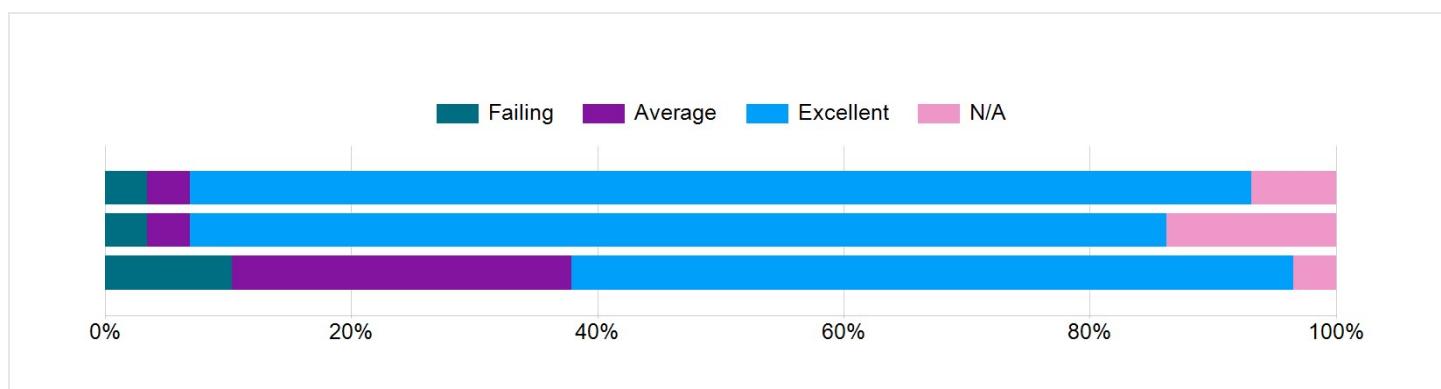

Statistics	Value
Response Count	29
Response Ratio	93.55%
Mean	8.20
Median	9.00
Mode	9
Standard Deviation	1.35

### 3. What is your rating of this course independent of the effectiveness of the TA?

Statistics	Value
Response Count	29
Response Ratio	93.55%
Mean	6.68
Median	7.00
Mode	9
Standard Deviation	2.28

Comments
My TA is great!
The TA was very helpful in helping me understand course concepts more thoroughly. They were always available to help and answer questions as well.
n/
Professor is terrible.
TA was great, best part of this course, very reachable/digestible/knows how to communicate properly
So good at teaching!
Engaging
My TA was wonderful and proved to be a great instructor. He made sure that we all understood and made discussion sections fun and engaging. He was also extremely helpful during office hours.
Hunter was an exceptionally amazing TA this quarter! I would take a course with him again if I could. He is a great communicator, incredibly enthusiastic, and would always come up with real world analogies which were super helpful in understanding the content. He clearly has an advanced background in CS but he did what few instructors at UCLA I've had have managed to do (TAs and professor alike) which is approach the content through the eyes of a beginner and build from there. It was fun how he'd present problems to us pretending that he too was just figuring them out for the first time. He deliberately made it feel like everyone's ideas were valid suggestions. Then we'd get to the end of the problem and it'd become apparent that he'd been super prepared and planned this all out. It takes skill to be so prepared that you can let your students take the reigns and still have the lesson go where you intended it to. He is also a super entertaining presenter and possibly a wizard. 10/10. Great TA.
PS if you're reading this Hunter: Thank you so much for a great quarter and for putting up with us! I wish this course had been a bit more important to my major so I could've come to discussion more often. Hope you have a lovely winter break!

## Comments

My TA for this course was great. He helped me understand topics that I didn't quite catch during lectures. He made discussions fun and interesting. The exams were fair and so were the grading. I would say the textbook could use some update.

Hunter is really approachable and he explains things super clearly!

His teaching is very engaging and entertaining. He tells common mistakes that students make, which allows us to learn more deeply about Pic10A

Amazing Ta should be a teacher

Hunter was an amazing TA. I learned most of the concepts through him rather than from lecture. The way he explained things made the new concepts easily digestible. He was also extremely helpful when I went to his office hours.

I think TA Liu is a very good teacher. I often struggled with understanding concepts discussed in lecture, but his discussion sections made a lot of sense and helped me understand and progress with the material. I also went to his office hours and he took time to make sure we all understood every question asked before moving on.

Grading is fair, teaching is good, and I find the textbook very helpful.

He is really knowledgeable, the textbook helps a lot, I hope grading for the final can be a bit easier.

This TA is great, super kind, approachable, understandable, and helpful. I would just say that sometimes the content that we go over in section does not always help with what we are learning for the course or like the homework, but that's where office hours are super helpful so it's not that big of a deal. Overall, great TA

The TA was very engaging, both in delivering material and applying concepts to code. However, I would have preferred to have a review discussion(s) before the midterm, rather than continuing on from the previous discussion.
