Comments
Hunter has got to be one of the most dedicated and passionate TAs. His qualifications and knowledge is impressive, but what really sets him apart from other TAs is his genuine desire to uplift students, especially from the perspective that many of us are new to coding. He has a sense of humor that adds to his friendliness, and his empathy shines through in every interaction. I feel incredibly fortunate to have had him as a TA and would love the opportunity to have him again in the future! His commitment to teaching and ensuring that students truly understand the material is evident. He consistently goes above and beyond, providing additional resources and tools to help us succeed. Plus, he is always approachable, making it easy to seek help or guidance.
Hunter is an excellent TA who is extremely passionate about teaching and the content, and helped me understand the content better! I thoroughly enjoyed attending his section!
Hunter Liu was incredibly helpful and responsive throughout the quarter. He explained difficult concepts clearly and was always patient during discussion and office hours. His support made a big difference in helping me understand the material.
Connections to things we can related when solving code is extremely helpful. Explanations were easy to follow.
Really great conceptual examples/lessons, as well as "project-based" examples that really helped elevate knowledge. Doing more examples/reviewing concepts that are more closely aligned with homework would be helpful.
Hunter is the best TA ever. I love going to his classes because he is always lively and explains complex topics in a way that makes everyone understand them. I have no doubt that he will be a thoughtful, engaging, and eloquent lecturer in the future. I wish I went to more of his classes. He truly is a gift.
